Connect Cables

Ticket Feed Slot

Modular Data Interface Plug-In

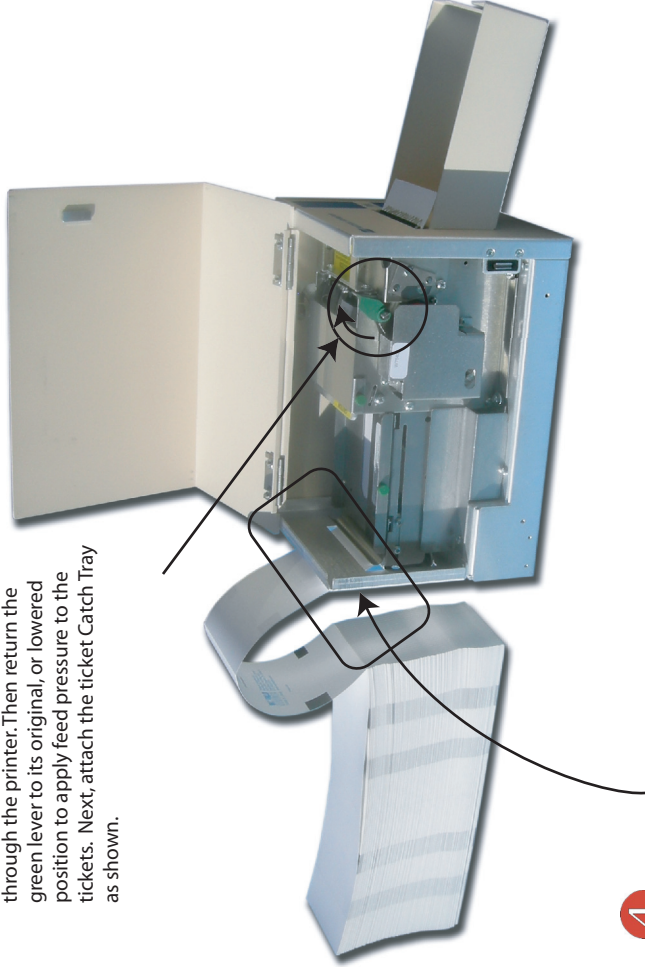

Available Options:

USB Serial Ethernet Parallel

Go to 7 for configuration information.

Insert Tickets

5 Rotate the green Pressure Feed Lever to an upright position, as shown, then continue to feed the tickets until they are all the way through the printer. Then return the green lever to its original, or lowered position to apply feed pressure to the tickets. Next, attach the ticket Catch Tray as shown.

4

Insert ticket, registration marks facing down, into the Ticket Feed Slot as shown

6

After the ticket is loaded and the green Pressure Feed Lever has been returned to the lowered position, press F0, and then F1 to print a test ticket. Next, press F0 again to go back online. Both Green LEDs will be ON when ready to print.
